Work Experience:-

Capital Numbers

Junior Software Developer

West Bengal, India
MAR 2021 - Current

- Leading the FrontEnd Development for a Payment gateway as a Service app.
- Integrated Payment Gateways like Cardstream, SagePay and REST APIs.
- Implemented payment services such as Repeat payments, Virtual Terminals, Bank Mandates, Refunds.
- Used **React.js**, **Typescript**, **Material UI**, **styled-components** for creating the UI.
- Integrated **AWS Codepipeline** and **CodeBuild** for CI/CD.
- Created **CloudFront** Distributions and **S3** buckets for deployments.

NetTantra Technologies

Software Developer

Odisha, India
JAN 2020 - JAN 2021

- Worked on a music streaming site [ZipDJ](https://zipdj.com) and developed the majority of the UI/UX of the site using React.js.
- Developed a custom music player module with functionalities like download, add to playlist, skip a track.
- Integrated REST APIs and Elasticsearch on the FrontEnd to search/filter songs, increasing the site **performance by 70%** which further helped to increase the **premium members** count up to **2x**.
- Also, created API endpoints using **Laravel** to implement functionalities like uploading or editing music releases and tracks for authorized members and integrated them on the FrontEnd using **React.js**.
- Used **SCSS** and **React.js** to create mobile responsive and user-friendly layouts.
- Designed and integrated Mega cloud storage functionality for users in the Spinvault project.
- Mentored a team of 5 junior developers in FrontEnd.

NetTantra Technologies

Software Developer Intern

Odisha, India
DEC 2019

- Developed a mobile responsive and optimised landing page for a FinTech Company using **HTML**, **CSS**, and **Bootstrap**.

Projects:-

Miny.in

An URL shortener service site.

- Minify or shrink your long URLs into tiny-miny URLs with custom URL input support.
- Developed the FrontEnd UI using **HTML**, **CSS**, **Bootstrap** and **JavaScript**.
- Used **Express.js** to create REST APIs for the app and **MongoDB** to store the URLs.
- **Source Code:** <https://github.com/BiswaViraj/url-shortener>, **Demo:** <http://www.miny.in/>

PlaYT

A terminal-based app to stream and download YouTube songs made with **Node.js**.

- Users can stream or download songs to their local drive.
- Plays the song from the local instead of streaming over the network if it is previously downloaded.
- **Source Code:** <https://github.com/BiswaViraj/playt>

Skillset:-

- **Languages:** HTML/CSS, JavaScript, SCSS
- **Technologies & Tools:** React.js, TypeScript, Express.js, Node.js, Elasticsearch, Kibana, MongoDB.

Education:-

College of Engineering Bhubaneswar

Bachelor of Technology, Computer Science and Engineering,
CGPA: 7.51 out of 10.00

AUG 2016 - AUG 2020
